1st circular

2016

Quaternary geology of north-central Poland: from the Baltic Coast to the LGM limit

We are most honoured to invite you to the next Peribaltic Working Group Field Conference, which will be held on 28.08-02.09.2016 in Poland. It will include two days conference in Władysławowo with introductory lectures, oral and poster sessions followed by four days field symposium.

Excursion topics:

Sandy barriers formed under sea-level rise and no-tide conditions
Pleistocene fluvial successions and record of deltaic sedimentation
Periglacial, glacial and glaciolacustrine sediments
The Late Weichselian glacigenic landscape in Poland

INQUA PERIBALTIC

1st circular

2016

Scientific sessions:

Quaternary landscapes and deposits
Methods of sedimentological and stratigraphical research
Coastal dynamics and sea-level change
Natural hazards and risk assessment

Key dates:

16.12.15 First circular
04.01.16 Start of website and regular registration
01.02.16 Second circular, start of abstract submission
31.05.16 End of registration
15.06.16 Third circular, abstract submission deadline
28.08.16 Start of meeting
01.11.16 Papers submission deadline for Quaternary International Special Issue

Fees:

Total fee will be 400 €. It covers conference materials, full board and transport during the meeting.

Where we start:

Conference will be held in Władysławowo.
We will transfer everyone by bus from Gdańsk Airport or Gdynia main railway station.
